Questions about memory dating After that you go to the library and check out every book on the subject. Find out what you have and begin your research. The best thing to do is to research the whole subject by reading different books. There are so many books written about memory dating, that you need to be very specific to find the best one to help you. Have you started to research? You will find books in every possible library or bookstore. You can find some at garage sales and some at thrift stores. One of the problems is that you can only look at what you have and you can't look at what you don't have. You start looking at all the books at the library and you find one that matches what you have in your head. You know how it works, so you know you will find one. You know what you will find. You know what you don't have. You compare the books and find a match, which means you find the book that you have all the answers you need. One of the big problems is that you know the answer, but you haven't looked at the book. You remember the answer, but you need to look at the book to know for sure. What if you don't have a memory match? Look over your notes and see if you have the answers. There is no need to limit yourself to one book. You can read every book you find. This is a matter of education. You don't always need a book for every question you have. You may use notes you wrote down from magazines or lectures that you have attended. Learn about and begin to use more than one book. You can use one book to start you off and then move on to another book if you feel you need more. One 3ef4e8ef8d
