Adobe Creative Cloud for Photography Description Like Photoshop, Lightroom Classic CC, Lightroom 6, and Lightroom for mobile apps are software development kits (SDKs). Lightroom for mobile apps, while having the functions of the Lightroom desktop app, was designed with a view to better fit the screen of a mobile phone. The primary difference between the two SDKs is the Lightroom mobile SDK allows the user to transfer images over the air through Wi-Fi or Bluetooth. Both SDKs allow the user to install the app on a device that lacks a camera or a storage solution. For iOS devices, the Lightroom mobile SDK allows the user to wirelessly transfer photos to the device, while the Lightroom desktop SDK enables the user to transfer photos or libraries through USB. Note: Lightroom Classic CC, Lightroom 6 and Lightroom for mobile apps for Android are available on the Google Play store. For iOS device Lightroom Classic CC, Lightroom 6 and Lightroom for mobile apps are available on the App Store. 1 and Adobe Creative Cloud for Photography apps can be easily combined, so that creative images can be displayed on a mobile device and then edited in Lightroom desktop app. Service Lightroom Classic CC for desktop (Windows and macOS) is free on the Creative Cloud, however users are encouraged to upgrade to Creative Cloud. Users can download the Lightroom desktop app for free. Similar programs In January 2007, Adobe announced the release of a Windows version of Adobe Bridge which it hoped would become the "standard" photo management software. Adobe Bridge is now included in the free version of Photoshop CS4, CS5 and CS5.5 as part of the Adobe Creative Suite 5. Adobe Bridge uses the same export and color space workflow as Lightroom. Adobe Bridge was also an available upgrade for Photoshop CS3 users. Adobe Bridge was not available for other platforms, although version 5 of the app was available for iPad. In 2007 Adobe announced the release of Aperture, a competitor to Lightroom. In 2009 Adobe announced that Aperture and Lightroom would be combined into the new application Adobe Lightroom. In 2012 Adobe Lightroom discontinued support for older versions, and beginning with version 5.4 it will only support Adobe Camera RAW. Lightroom is available on the Mac OS X App Store. Lightroom is not available on the iPad App Store, but Lightroom for mobile on iOS is available. Lightroom for mobile can only import photos from the camera, and only compress
