2000, un grupo de campesinos descontentos de Bolivia pone en marcha una huelga general. On the plus side, Apple has acquired a cloud-based mapping service called Keyhole from Google, and when it comes to security, the NSA has just released a tool called Inrupt that can help it take a closer look at data flows inside a company's network. As the

---

NSA enters its next phase of massive data collection, both Keyhole and Inrupt show what they can do to bolster the security of private networks, said Rob Enderle, a technology analyst for the Enderle Group. 2d92ce491b
