The app was originally presented at the ACM POSIX and FSF developer summit, but was then released to the public in October 2017. While the developer himself is yet to release the official version of the eDEX-UI application, there are various 3rd-party versions that are freely available. Designed specifically for the Apple iPhone, this app offers a wealth of options, including viewing and recording files through a remote server, storing the files through Dropbox or iCloud, sharing and printing of the data while sending it to an external device. For instance, it can display the contents of the files and folders found in the phone as well as copy and paste images, PDFs and everything else. Online FileTransfer The app works more like a secure online file sharing service that lets you transfer files from one user to another through a desktop computer or mobile device. Any data you share through this app is available in cloud storage space and can be viewed by anyone who is logging into the account. The service is created by Appcanary, a company that specializes in file storage. The company explains how this specific tool works: "If you're working at an office where the company has a formal File Transfer service (like Dropbox, Box or Google Drive), and you're dissatisfied with the file transfer process, Online FileTransfer is a quick and simple replacement that will let you create private or public file transfers from your desktop computer and mobile devices to the cloud. "Keep in mind that Online FileTransfer does not work for files with a size larger than 2.5 GB. Files below that size can be

shared with other users directly from the Mac or PC where the files are stored. “To set up a transfer, log into the Account page of the site and select a file. Any user can start a file transfer by selecting it in the Shared Documents or Shared Folders list. Each time you accept a file, it’s saved to the cloud and ready for future transfers.” There are also different restrictions that you need to be aware of before sharing data in this app, which you can find in the FAQ section of
