Instead, it allows a viewer to inject their own narrative. Perhaps that's why one of the set's most basic features is its ability to display a poster on a slide show. Though the original D-Brick line mostly played with the image of the poster, this latest iteration adds interactivity by letting you share your favorite images on social networks, so that others can see them, too. time and income sources. However, there is no evidence as to whether this occurred. [3] The Orphans' Court issued a comprehensive order on July 20, 2013, which reviewed and sustained the exceptions of the estate to the inventory and appraisal. This appeal concerns only the estate's objections to the taxable costs claimed by the personal representative. [4] Butler v. Matteo, 564 Pa. 572, 769 A.2d 1165 (2001), overruled on other grounds, Green Acres Trust v. Commonwealth, 565 Pa. 571, 777 A.2d 619 (2001). [5] The estate notes a lack of precedent on the subject, and we agree that there is a dearth of precedent, particularly on the subject of the application of the Dead Man's Act where a party has attempted to circumvent the statute. [6] The estate first argues that there is a question of law regarding what constitutes a tort. An argument that there is a question of law regarding the tort of interference with an inheritance, however, is waived because it was not raised before the Orphans' Court. In re Toth Estate, 463 Pa. 34, 35, 342 A.2d 481, 481-82 (1975) (stating that "[i]ssues not raised in accordance with the Pennsylvania Rules of Civil Procedure or in the court below will not be considered for the first time on appeal") (citation omitted). Furthermore, the estate's bald assertion that Dr. Lewis' tort action constitutes a violation of the Dead Man's Act is not a question of law. Rather

Preliminary evidence indicates that these analogues are excellent substrates for enzymes that recognize their nucleic acid complement and that they are readily incorporated into living cells. We will use these analogues of DNA to define the structural requirements for binding to proteins that are known to play a role in the regulation of gene expression. We will also use the analogues to examine the structure and the catalytic properties of enzymes that mediate the synthesis, the processing and the degradation of nucleic acids. in many ways. So I don't think it's so much that they're creating this oppressive atmosphere but rather that the culture that they're creating has made it a needful thing to create this oppressive atmosphere. So just reading some of these comments and seeing the way that they act to back these ideas or back these opinions, and even the personal attacks that are hurled at those who stand up against them, I think there's two elements to it. On the one hand there's a really impassioned feeling that these things need to be discussed in an
